I turned **complex banking and healthcare** data into clear **models and scalable architecture** that teams can trust. Over **6 years**, I've built data products, dashboards, and integrations that make decisions easier and I also bring a knack for **product leadership and intuitive design** that makes working with me effortless.

Technical Skills: SQL, Python, Data Modeling (conceptual/logical/physical), ETL/ELT, Data Governance, Metadata & Reference Data Management

Cloud & BI: AWS, Azure, Power BI, Tableau

Tools & Workflow: ERwin / ER Studio, Git, Jira, Figma, M365, G-Suite

Johnson Grammar School CGPA 9.3	Jawaharlal Technological University CGPA 8.7	First Citizen Bank Data Architect	Baxter International Inc Senior Engineer

Certifications

Microsoft Certified Cloud Engineer | OCI | PM | Data Architect

Professional Experience

Analytical Engineer | Baxter International Inc (Aug 2023 – *)

- **Integrated AWS, Oracle, SAP, Coupa, and JDE data** into a unified procurement model → e**nabled 4-region, 20+ user group analytics.**
- **Built automated AWS pipelines** from ingestion to Power BI dashboards → r**educed reporting cycle time and increased data reliability.**
- **Modeled strategic M&A data products** for Hillrom acquisition and Kidney Care spin-off → **simplified organizational complexity for leadership analytics.**
- **Designed cross-platform KPIs** for supplier engagement and PO lifecycle → **improved finance-procurement reconciliation and trust in data.**
- **Engineered master and hierarchy data files** → **strengthened Baxter's Supplier Master System and ensured consistent global reporting.**

Data Architect & Modeling Lead | First Citizen Bank (Dec 2019 – Aug 2023)

- **Redesigned enterprise banking data architecture,** integrating multi-domain products (Customer 360, Investor 360, Loans, FX, Credit Cards) → **boosted analytical querying performance and increased cross-team data usage** and improved regulatory reporting.
- **Automated data workflows** including pitchbook matching and modeler tasks → **10+ manual tasks eliminated, $300K annual savings.**
- **Spearheaded data mesh framework** connecting 4 business units (Commercial, Private, Life Science, Capital) → **accelerated cross-unit analytics and governance adoption.**
- **Optimized ETL and data pipelines** for 30+ projects using Agile & SAFe → **shortened integration timelines and improved data quality.**
- **Developed metadata and reference management models** for OLTP, OLAP, and Big Data environments → **enhanced compliance and data discoverability.**
